[Portfolio Website](#)

An IT professional with extensive experience working with and across teams in collaborative and fast-paced environments. I've worked with the Department of Defense (DOD), the Commonwealth of Massachusetts, and Harvard Medical School in hybrid, on-site, and remote capacities. Building projects to get into the cyber security field.

PROJECT EXPERIENCE

PFSense Firewall VM

- Creation of PFSense Firewall VM for Firewall for setup and configuration of network interfaces for other VMs, IP address assignments, and rules on data traffic for network segmentation and isolation of other VM's on the network.

Kali Linux VM

- Built a Kali Linux VM for use in configuring the PfSense firewall and future projects involving cybersecurity scenarios and Penetration testing on my homelab network.

Windows Server VM

- Built a VM of Windows Server 2019 as a Domain Controller in home lab for cyber security testing and learning DHCP, DNS and AD server administration for users and computers created for and joined to the domain. Made vulnerable for hands on penetration testing.
