

Alex Mans

Web Application Developer

alexjmans@gmail.com

Portfolio

An IT professional with extensive experience working on complex IT infrastructure across multi disciplined teams in collaborative and fast-paced environments. I've worked with the Department of Defense (DOD), the Commonwealth of Massachusetts, and Harvard Medical School in hybrid, on-site, and remote capacities.

PROJECT EXPERIENCE

Portfolio Website

- Created a portfolio website for displaying personal projects in web development.
- Through this project, I was able to comprehend the principles of web development such as layout, responsive design, and how to utilize HTML, CSS, and JavaScript as a developer.

Technologies: HTML, CSS, JavaScript, Github Pages

Magic the Gathering Card Search

- Created a Magic the Gathering search bar app that retrieves data from an API which is then filtered through filtered search results. Card information is displayed upon selection.

Technologies: React, API integration, Reactive Programming, Firebase, CDN, Hosting

Firebase To-Do List Authentication App

- A CRUD application for managing tasks. Task data is managed in the NoSQL database, Firestore. Users can also create accounts and authenticate through firebase by email address and password. With this application, users can view, add, save, and delete their own custom task list.

Technologies: React, JavaScript, CSS, Google Firebase, Backend Integration, Authentication, Database
